TECHNICAL EXPERIENCE

Software Developer	**General Motors**	**June 2016 - Present**

- Work as a Software Developer in the Manufacturing Quality department where our focus is developing software solutions for our manufacturing plants and improve the overall quality of GM vehicles.
- Architect, develop, and deploy new software solutions for the manufacturing plants.
- Build internal tools to facilitate quicker application development through common reusable components.
- Introduced standards and examples for Angular unit testing inside GM.
- Help maintain and improve legacy applications and respond to production issues.
- Mostly work on front-end but have experience doing full-stack work and developing RESTful API's.
- Primarily work with Angular (1 to 6), Typescript, Javascript, HTML, CSS/LESS, C#, .NET and .NET Core.
- Version control and CI/CD through Git, TFS, and Pivotal Cloud Foundry.

Software Engineer / Marketing Analytics Intern	**Silicon Labs**	**May - August 2015**

- Worked with the Marketing Analytics team as well as the Simplicity Studio team on both internal and consumer applications.
- Primarily worked on building a trip report desktop application that could sync data with salesforce.
- Wrote and debugged test scripts for the Simplicity Studio desktop application.
- Worked with Python, C#, CoffeeScript, Vue.js, HTML, CSS, Salesforce API, IndexDB, and Github Electron

Full-Stack Engineer	**PineconeHR**	**May - October 2014**

- Worked as full-stack engineer adding new and improving current features, as well as removing bugs in the codebase.
- Helped with design decisions ranging from simple UI tweaks to rebuilding company landing page.
- Largely coded in Ruby on Rails, CoffeeScript,Batman.js, and some PostgresSQL,.
